OUR JOURNEY

YEAR
2016

STARTED TECHNO VISION INDUSTRIES
Machine shop with drilling operations.

YEAR
2017 -18

STARTED TATA MOTORS NEXON
Roof Rail bending and drilling operation with area 1000 sq.ft.

YEAR
2019 -20

EXPANDED TO 8000 sq.ft. AREA
Started fabrication work and machining solutions.
Major supplier for Motherson, Brembo,

YEAR
2021 -25

STARTED MANUFACTURING OF MATERIAL HANDLING EQUIPMENT
with in Chakan MIDC.

JANUARY
2026

SHIFTED TO NEW FACILITY
with land area ***34,000 sq.ft.***
Also started working with OEMs
TATA | MAHINDRA | HUNDAYI with in-house facility.

OUR APPROACH

We follow a structured process from **design to finished product**.

01

Design

Develop designs and prototypes to meet customer requirements.

02

Production

Use dedicated fixtures, MIG welding and robotic welding for consistent production.

03

QC & Dispatch

Apply powder coating or paint, with appropriate surface treatment for a durable finish.

Our Design Capabilities

Skilled engineering team experienced in **2D drafting, 3D modelling**

CATIA

SolidWorks

AUTODESK AUTOCAD

WHY CHOOSE US

Infrastructure

34,000 sq. ft

facility with dedicated fabrication, assembly and quality areas.

Modern Technology

MIG and robotic welding for precision and consistency.

71%

Custom Manufacturing

71% of our customers seek customised solutions. We turn their requirements into practical products.

81%

Long Term Partnerships

81% of our customers reorder from us : a reflection of trust customers place in our quality and service.

MANUFACTURING STRENGTHS

SR.	MACHINE NAME	QUANTITY

OUR SOLUTIONS

For Logistics & Automotive Industry

01 **CUSTOMISED MATERIAL HANDELING**
TROLLEY & PALLETS

02 **PAINTSHOP**
POWDER COATING AND PAINTING

03 **ROBOTING WELDING**
CUSTOM WELDING PARTS

04 **STRUCTURAL WORK**
SHADES, MAZZANINE, FENCING, RAILING

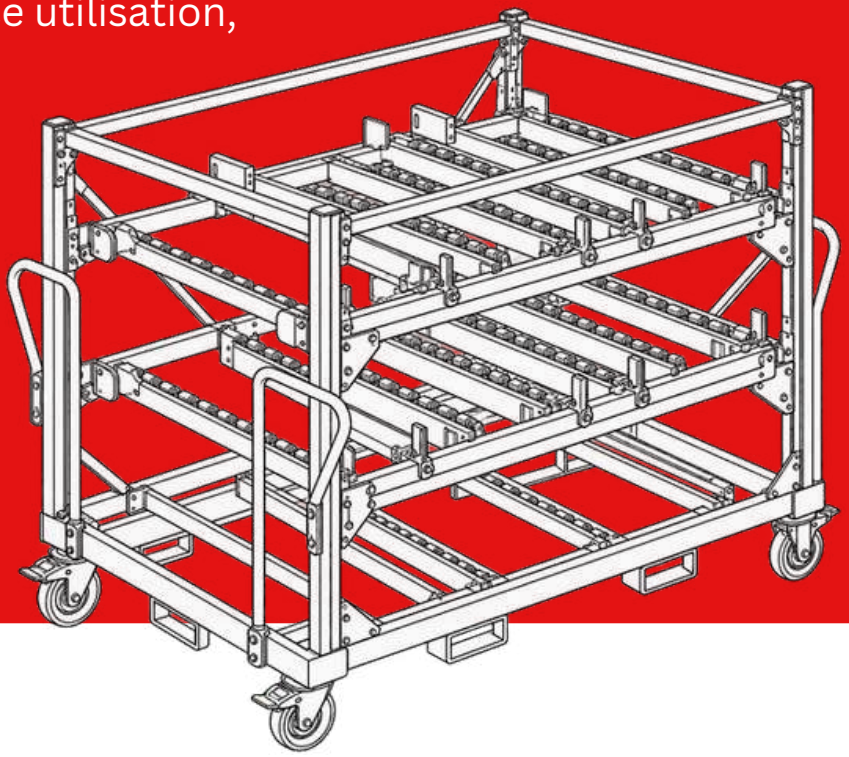

05 **CUSTOMISED PRODUCT**
INSPECTION TABLES, LIFTING TACKLES, DUNNAGE BAGS, COVERS FOR AUTOMOBILE PARTS,

06 **LAZER CUTTING PARTS**
SHEET METAL,

MATERIAL HANDELING SOLUTIONS

Our material handling solutions are designed around specific operational requirements, helping improve workflow, space utilisation, and handling efficiency.

From fabricated pallets and storage bins to industrial trolleys and custom-fabricated products, we deliver durable, reliable solutions tailored to each client.

Collapsible Wire Mesh Cage Bin

Covered Returnable Parts Trolley

Material Handeling Solutions

Automotive Parts Storage Rack

Custom Material Handling Trolley

Steel Pallet

Covered Textile Pocket Parts Rack

Foam Dunnage Trolley

Material Handeling Solutions

Gas-strut Tilting Rack

Tilting Shelf Trolley

Covered Returnable Trolley

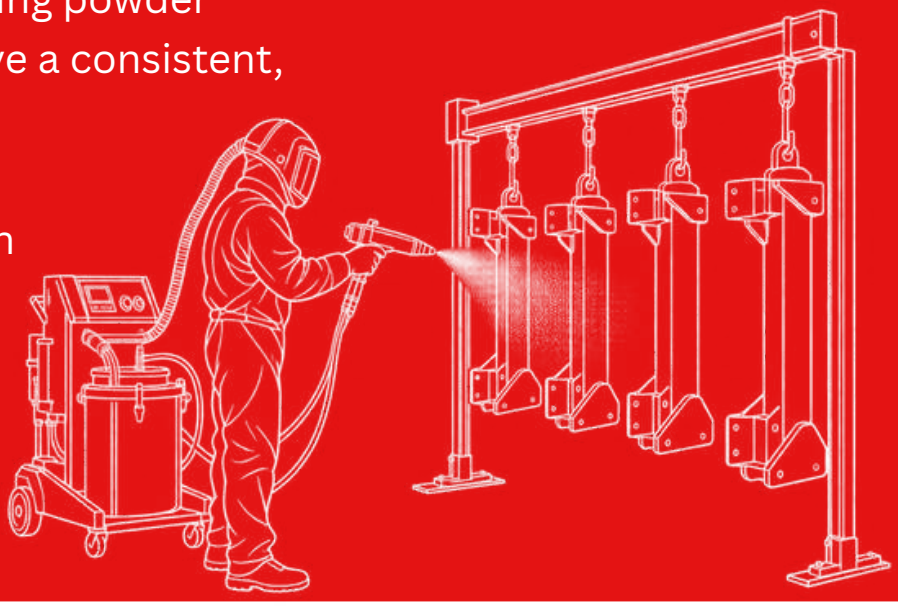

Diesel Particulate Filter Rack

OUR PAINTSHOP SOLUTIONS

Our paintshop provides finishing solutions for fabricated metal products, using powder coating and painting to achieve a consistent, durable surface.

Our batch-type, gas-fired oven accommodates trolleys and metal components for controlled finishing operations.

Type : Ground-mounted, direct gas-fired batch oven
Operation: Manually operated doors with trolley movement on internal rails
Internal Dimensions : 2100 (W) × 2400 (H) × 5700 (L) mm
External Dimensions : 2750 (W) × 3050 (H) × 6000 (L) mm

Paint Shop

TechnoVision Powder Coating Facility

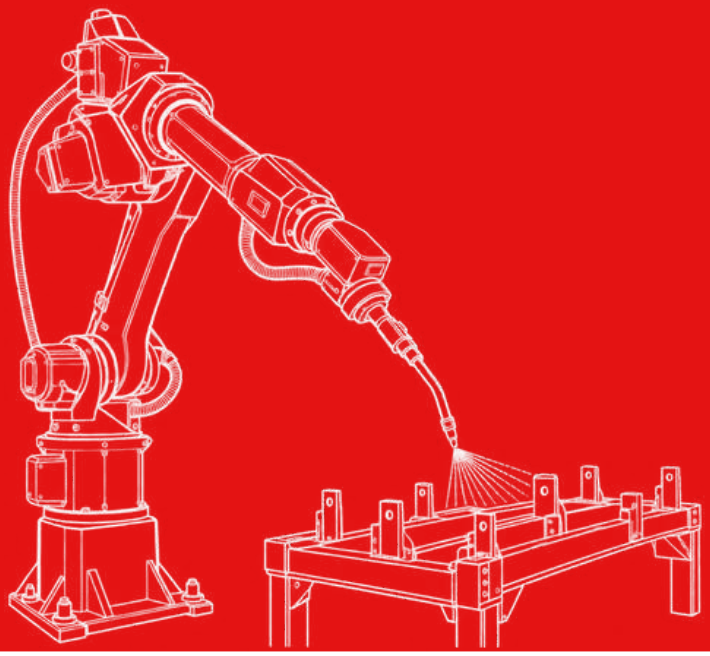

OUR ROBOTIC WELDING SOLUTIONS

Our robotic welding capabilities deliver precision-welded components with consistent quality and repeatable results.

We manufacture brackets, stud assemblies, locating pins and other metal components to customer drawings and specifications, ensuring accurate fitment and durable weld joints.

Brand : FANUC Corporation (Japanese precision technology company)
Qty : 02

OUR STRUCTURAL WORK

We undertake structural fabrication work for industrial and commercial applications, including mezzanine platforms, shed structures, fencing and railings.

Each project is built to suit site requirements, with a focus on structural integrity, durability and practical functionality.

OUR CUSTOMISED SOLUTIONS

We develop customised industrial products to meet specific customer requirements, including inspection tables, lifting tackles, dunnage bags and protective covers for automotive parts.

Each solution is designed around its intended application, with a focus on practical functionality, durability and reliable performance.

OUR LASER CUTTING PARTS

We provide sheet metal solutions for industrial applications, including precision-cut components and fabricated parts.

Our focus is on dimensional accuracy, consistent quality and components manufactured to meet customer drawings and specifications.
